

Company Overview

We are a small precision machine shop located in Greensburg, PA. Founded in 2004 and incorporated in 2015 we specialize in close tolerance saw cutting and finishing of hard to machine materials. Nickel alloys and hi-temp alloys are the kinds of materials we primarily deal with; however, we have the capability to handle anything you need machined. Our mission is to be the strongest link in your supply chain.

Core Competencies

- Close tolerance saw cutting and finishing of hard to machine materials such as nickel alloys and other specialty alloys.
- Production runs, prototype and reversed engineered parts
- Part assembly.

Differentiators

- ISO 9001:2015 Certified
- Currently conform to 107 of 110 controls of the NIST 800-171 cybersecurity standard.
- Responsible fiscal management, our company carries no debt and can expand as needed to meet customer needs.

Past Performance

- Allegheny Technologies (ATI)-Machining and finishing of nickel alloys produced by Hot Isostatic Pressing (HIP).
- Sophisticated Alloys-Machining and finishing of nickel alloys.
- ABB-Machining, finishing of various materials, including aluminum and carbon steel. Assembly as required.

Capabilities

- Discover D-12 Coordinate Measuring Machine (CMM)
- Chevalier 24"x 80" lathe
- Chevalier 24"x 60" lathe
- Doosan Puma GT 3100 lathe
- Doosan Puma 300 lathe
- Hyd-Mech H-14A bandsaw (2)
- Hyd-Mech H-18A bandsaw
- Fadal 40"x 20" x 28" mill
- Doosan Mynx 5400 mill
- Lehigh 50" x 120" manual lathe
